## OVERVIEW

Motivated and self-driven BCA student with practical experience building MERN Stack applications, backend systems, and real-world business solutions. Interested in backend development, automation workflows, scalable APIs, and AI-assisted systems. Built personal and client-focused projects while continuously learning modern development technologies and problem-solving approaches.

## EDUCATION

**Chhatrapati Shahu Ji Maharaj University, Kanpur**  
**Laughing Buddha Academy, Kanpur**

*Bachelor of Computer Applications (BCA)*  
*Higher Secondary & Senior Secondary Education*

## PROJECTS

### RevenueOS — AI Business Optimization Platform (Ongoing)

*React.js, Node.js, MongoDB, n8n*

[revenueos.web.app](https://revenueos.web.app)

- Developing a business intelligence platform focused on workflow analysis, automation, and customer experience improvement using AI-driven insights.
- Integrating n8n automation pipelines for workflow optimization and operational efficiency.

### NEX Log Logistics Management System

*React.js, Express.js, MongoDB*

[nexloglogistics.web.app](https://nexloglogistics.web.app)

- Built a logistics and shipment management platform with order handling and operational workflow tracking.
- Implemented SVG-to-data conversion for storing multimedia directly inside MongoDB, reducing third-party storage dependency and infrastructure costs.

### SupportHub (WIMOBOT)

*Node.js, Express.js, MongoDB*

[wimobot.onrender.com](https://wimobot.onrender.com)

- Developed a backend-focused support system with ticket workflows, canned responses, messaging features, and admin management tools.
- Designed modular REST APIs and scalable backend architecture for organized support operations.

### DhanLaxmi Enterprises — Official Website

*React.js, Firebase, Firestore*

[dhanlaxmien.web.app](https://dhanlaxmien.web.app)

- Developed and deployed a responsive business website with Firebase Hosting and Firestore integration for lead management and business branding.
- Implemented responsive UI, real-time data handling, and custom deployment workflow.

### Browser Media Player

*React.js, JavaScript*

- Built a browser-based media player supporting videos, images, and PDFs with playback controls and file navigation features.

## TECHNICAL SKILLS

|            |                                                                 |
|------------|-----------------------------------------------------------------|
| Languages: | JavaScript, Python                                              |
| Frontend:  | React.js and React Native, HTML5, CSS3, Responsive UI           |
| Backend:   | Node.js, Express.js, REST APIs                                  |
| Databases: | MongoDB, Firebase Firestore, MySQL (basic), PostgreSQL (basics) |
| Tools:     | Git, GitHub, Postman, Firebase, Docker, K8S                     |
| Learning:  | n8n, AI Workflow Automation                                     |

## ADDITIONAL INFORMATION
